01

Cost Comparison Analysis Report

Department Expense Comparison Analysis (Summary)

Users can freely combine quarterly (CF) and monthly (FC) expense variation scenarios to compare expected cost differences by department.

02

Cost Comparison Analysis Report by Department

Department Expense Comparison Analysis (Detail)

Drill down Low/High Case expected expenses by item and check CF vs FC cost differences at a detailed item level.

03

User Authorization Monitoring Dashboard

User Authorization Status Monitoring

Visualizes user access rights across all company applications through KPIs, charts, and detail tables.

04

Summary of Working Overtime Dashboard

Monitoring of overtime status by department

Visualizes monthly overtime hours by department in real time, providing a clear view of workforce efficiency and attendance management status.

Actual data has been replaced with dummy data for security compliance.

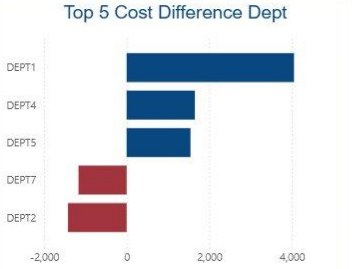
Detailed Cost Difference by Departments



Unit Price : mKRW

Dept	CF_25 P&L w/o O&R	CF_25 w/ O&R	FC_25 P&L w/o O&R	FC_25 w/ O&R	Difference
DEPT1	5,048	5,048	9,100	9,100	4,052
DEPT2	7,654	7,654	6,234	6,234	-1,420
DEPT3	52	75	9	27	-48
DEPT4	48	48	1,700	1,700	1,652
DEPT5	154	154	1,700	1,700	1,546
DEPT6	501	501	355	355	-146
DEPT7	2,140	2,140	975	975	-1,165
Total	**15,597**	**15,620**	**20,073**	**20,091**	**4,471**

Purpose

- Users can freely combine quarterly (CF) and monthly (FC) expected expense data to instantly compare and verify cost differences by department.

Key Features

- 3 KPI cards for key metrics
- **Base 1·2 Free Combination -** Independently select Base 1·2 to compare cost differences between any two time points (CF vs CF / FC vs FC / CF vs FC)
- **Automatic Difference Calculation-** Difference value and visual graph update instantly upon selection
- **CF/FC Comparison-** Compare Low/High Case expected expenses between CF and FC values (P&L w/o O&R · w/ O&R)

Tech Stack

Power BI · Power Query · DAX · Excel

10h→1h

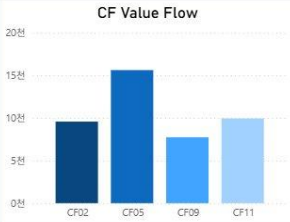
- Manual report creation involving data collection, processing, and verification was reduced from approximately 10 hours to around 1 hour.
- Slicer selection instantly switches between CF and FC scenarios, reducing repetitive data generation work.

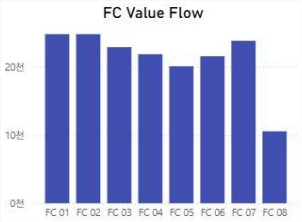
02 Cost Comparison Analysis Report by Department

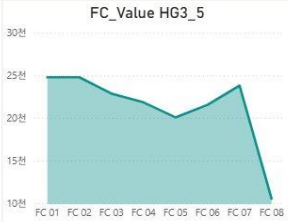
Cost Comparison Analysis Report by Department

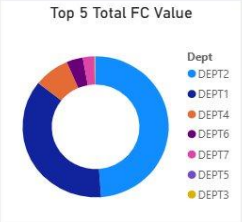
Year: 2025 | Dept: 모두 | CF: CF05 | FC: FC 06

Unit Price : mKRW









Unit Price : mKRW

Department	CF05 Total Expense			FC 06 Total expense			Cost Difference
	CF Low Case	CF High Case	CF Total	FC Low Case	FC High Case	FC Total	
DEPT1		5,048	5,048		7,950	7,950	-2,902
DEPT2		7,654	7,654		10,524	10,524	-2,870
Lv2_Measure_6		1,500	1,500		4,500	4,500	-3,000
Lv2_Measure_7		1,654	1,654		3,000	3,000	-1,346
Lv2_Measure_8		4,500	4,500		3,024	3,024	1,476
DEPT4		48	48		1,700	1,700	-1,652
DEPT5		154	154		35	35	119
DEPT6		501	501		781	781	-280
DEPT7		2,140	2,140		546	546	1,594
DEPT3	23	52	75	18	9	27	48
합계	23	15,597	15,620	18	21,545	21,563	-5,943

Purpose

- Drill down Low/High Case expected expenses by item at the department level and verify CF vs FC differences down to detailed item categories.

Key Features

- **Slicer Integration :** All 4 charts update simultaneously with Year,
- **Department, CF, and FC filters3-Level Drill Down** :Department > Item >
- **Sub-item level CF vs FC cost comparisonConditional Formatting** : Positive cost differences automatically shown in green, negative in red

Tech Stack

Power BI · Power Query · DAX · Excel

Drill down through Department → Item → Sub-item levels to instantly verify CF·FC projected cost differences at the granular level.

Example: Compare Q1 Department A, Item G, Sub-item C expected expenses vs March-based projections to quickly identify the root cause of budget variances

Purpose

Track user access rights across all company applications and monitor permission status through monthly data updates.

Key Features

- **5 KPI cards**: Total rows, IT Applications, Organizations, Identities, Access Right Assignments
- A Number of Roles by Application bar chart
- 5-slicer combination for immediate filtering by department, application, or role
- **Detail Table** : Contains information on user-held permissions including Application, Employee ID, Role, and role description

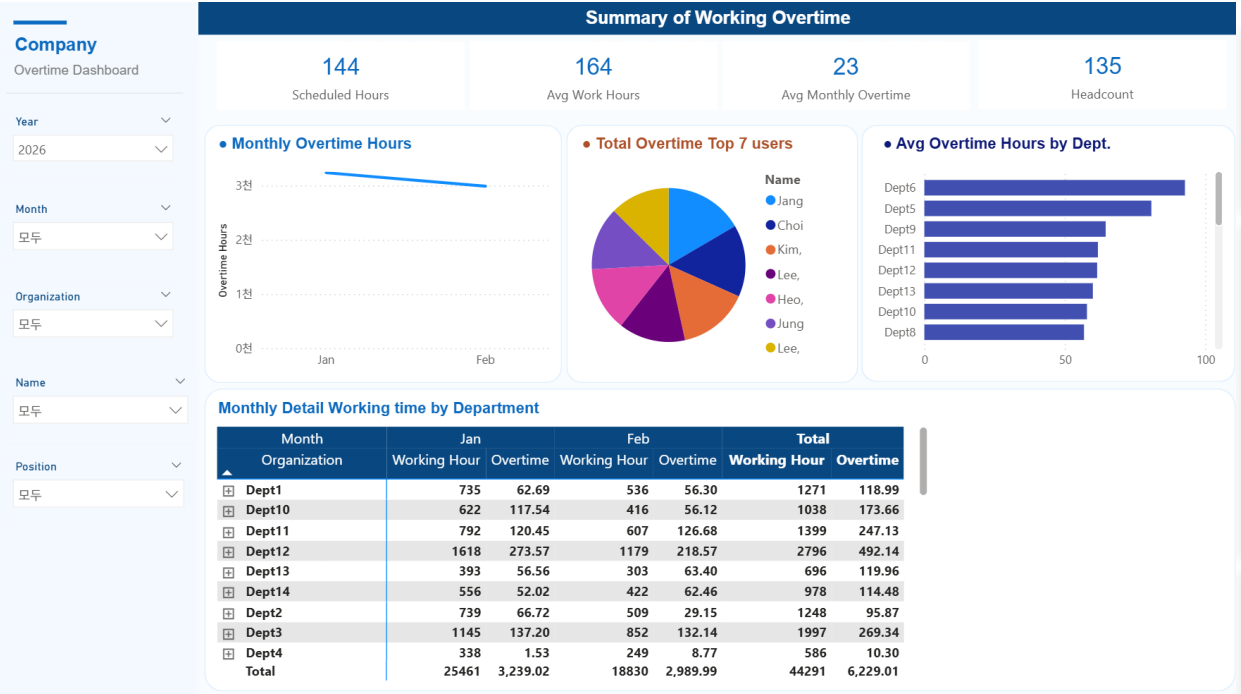
Tech Stack

Power BI · Power Query · Power Automate · Excel

28h→3h

Reduced data extraction and processing time for annual Access Recertification from 28 hours to 3 hours (89% reduction).

04 Summary of Working Overtime Dashboard



Month	Jan		Feb		Total	
Organization	Working Hour	Overtime	Working Hour	Overtime	Working Hour	Overtime
Dept1	735	62.69	536	56.30	1271	118.99

Purpose

Visualizes monthly overtime hours by department in real time, providing a clear view of workforce efficiency and attendance management status.

Key Features

- **4 KPI Cards:** Scheduled hours, average work hours, average monthly overtime, total headcount
- **Monthly Overtime** : Line chart for tracking monthly variation trends
- **5 Slicers** (Year, Month, Organization, Name, Position) for multi-dimensional filtering
- **Monthly Detail Table by Department**: Drill down into work hours and overtime by month

Tech Stack

Power BI · Power Query · DAX

New Report

Built the overtime monitoring system as a dashboard to track attendance status by department and support data-driven workforce management decisions.
